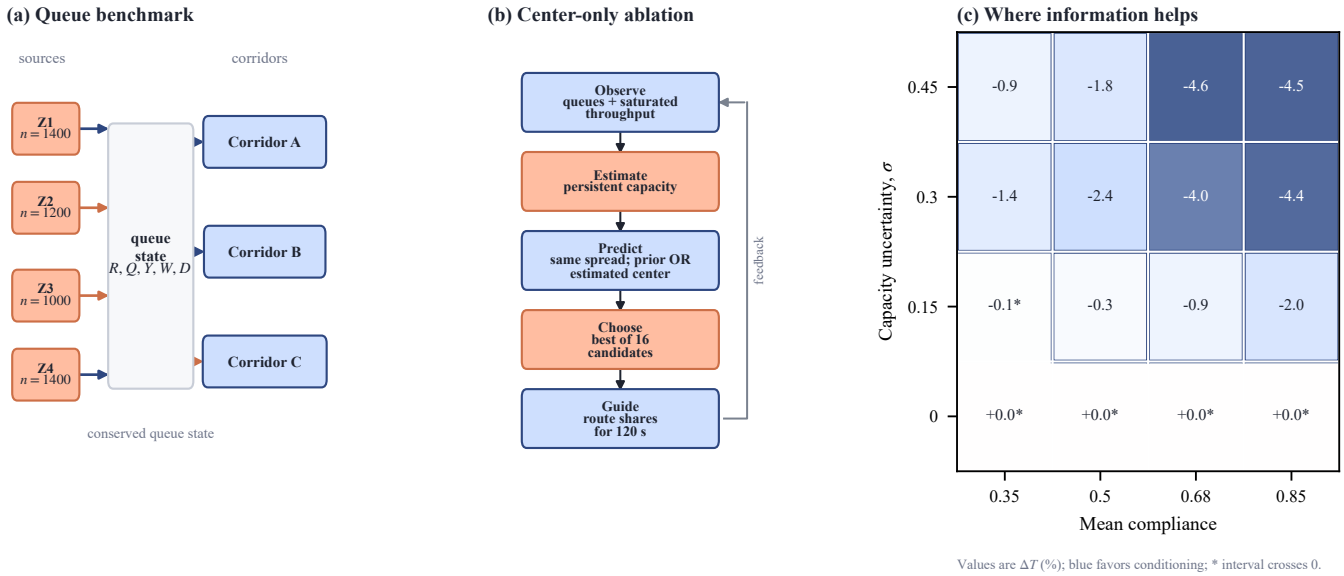

Figure 1: Benchmark and information value

Both views use full text width; the baseline paper used 90%.

Before — baseline dc1d9f4

Values are ΔT (%); blue favors conditioning; * interval crosses 0.

After — targeted camera-ready refinement

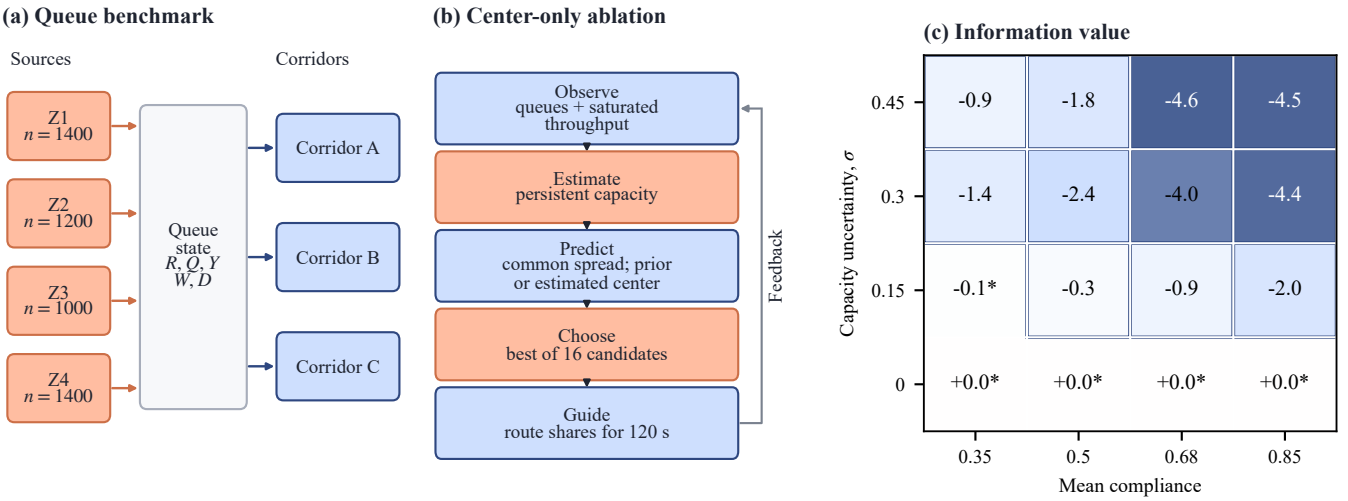

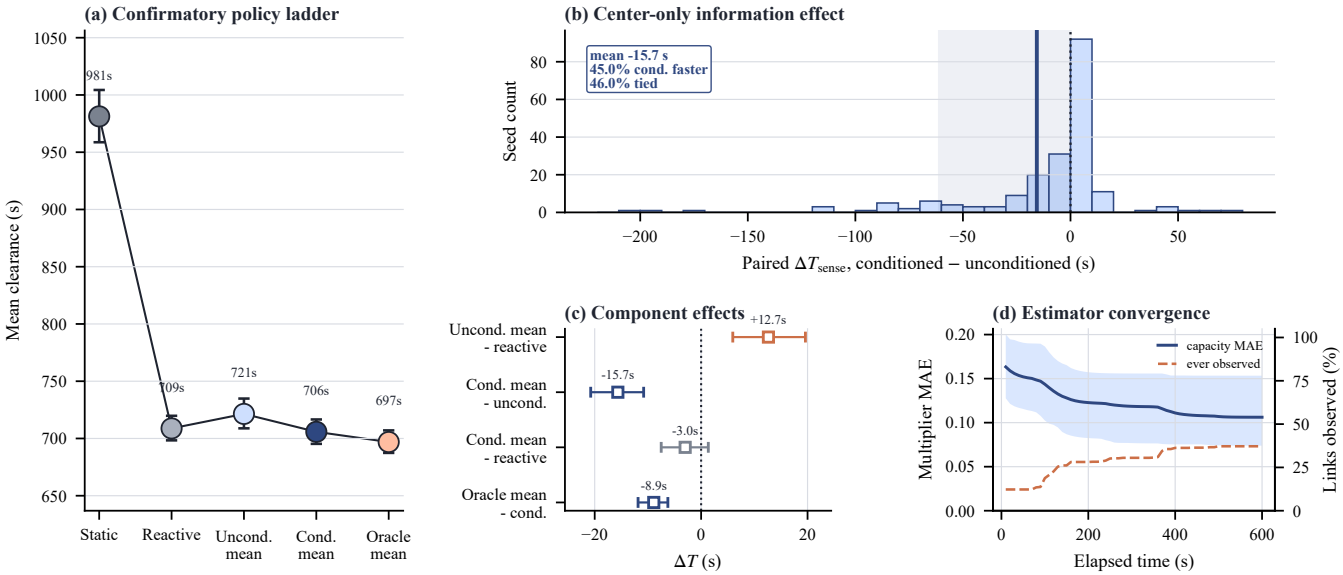

Figure 2: Primary evidence

Both views use full text width; the baseline paper used 90%.

Before — baseline dc1d9f4

After — targeted camera-ready refinement

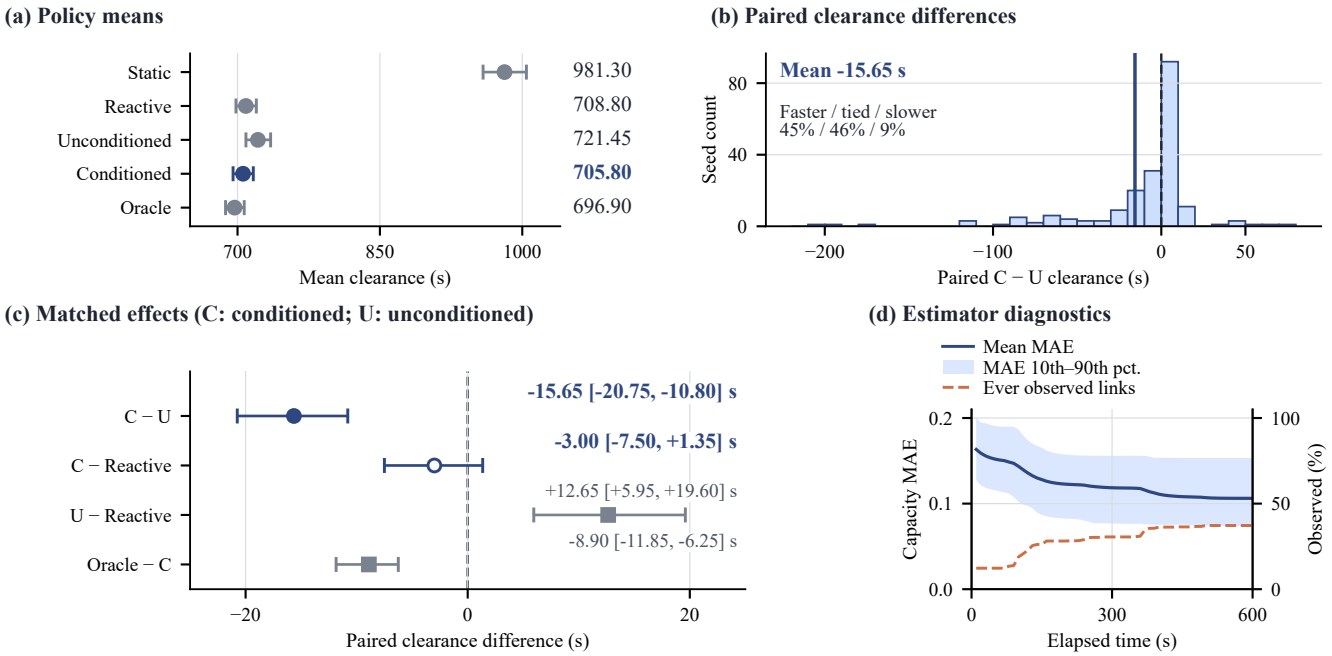

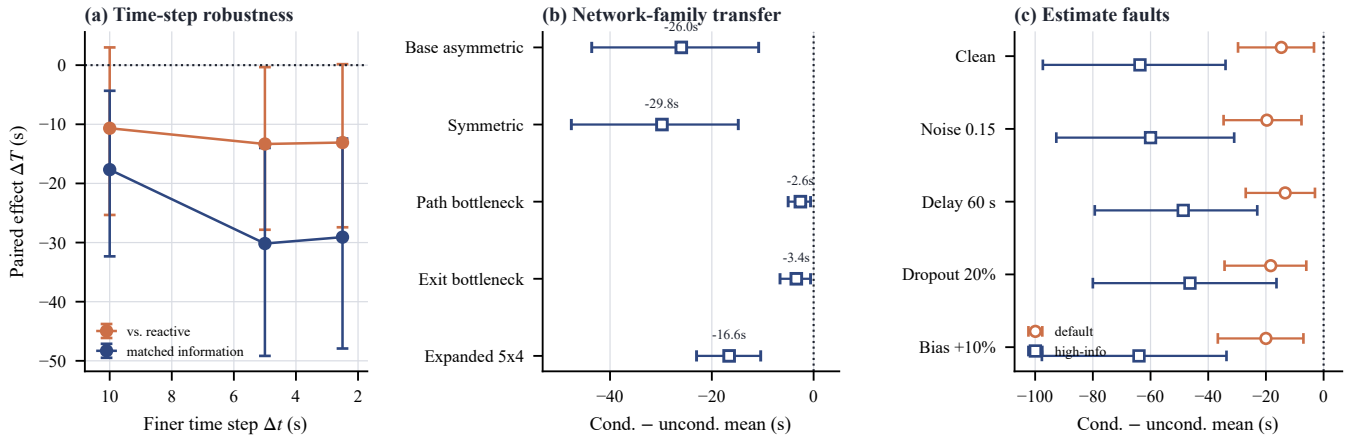

Figure 3: Robustness and failure diagnostics

Both views use full text width; the baseline paper used 90%.

Before — baseline dc1d9f4

After — targeted camera-ready refinement

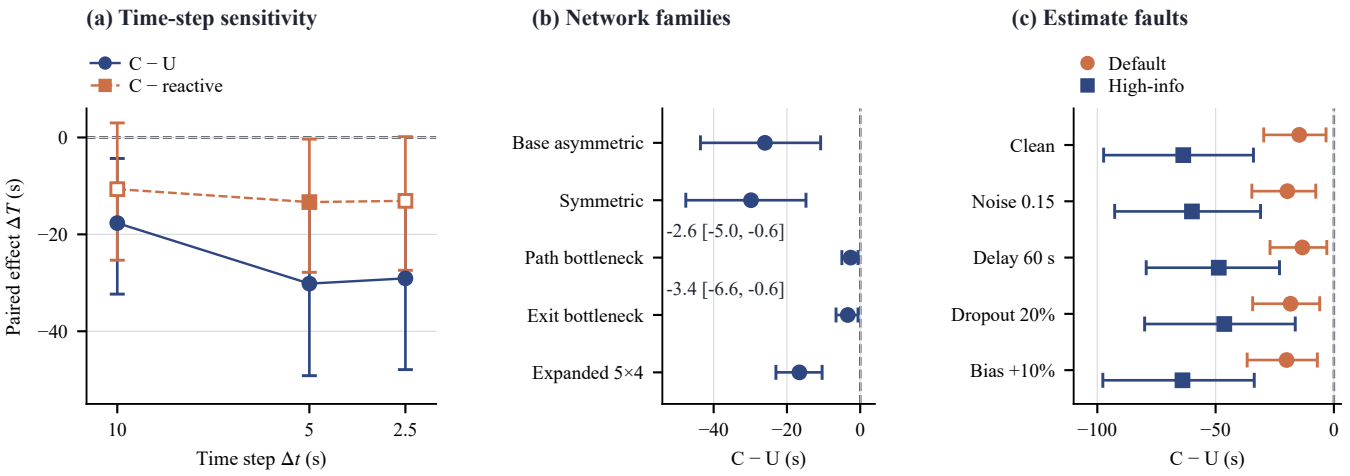

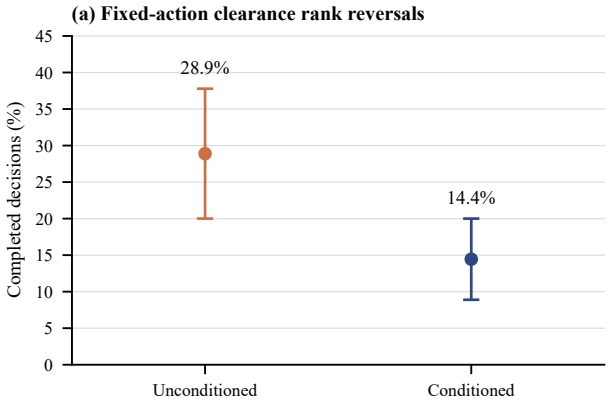

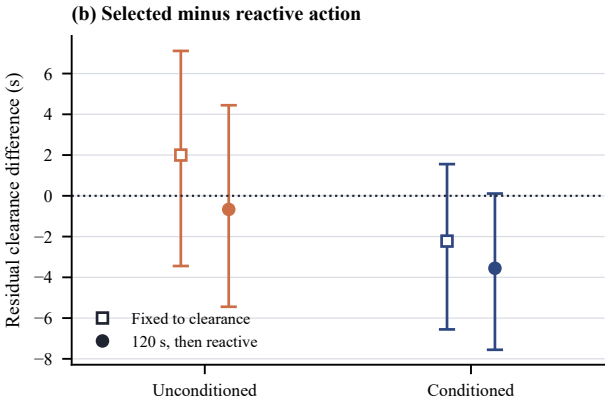

Figure 4: Same-state diagnostics

Both views use full text width; the baseline paper used 90%.

Before — baseline dc1d9f4

After — targeted camera-ready refinement
